Dear OpenAI:

It is with great interest that I write to you to submit my candidacy for the Software Engineer Intern role advertised at OpenAI, my resume is enclosed for your review. I will be graduating from Georgia Tech in December of 2024 with a Bachelor of Science in computer science and in December of 2025 with a Master of Science in computer science specializing in machine learning. I would welcome the opportunity to add value to your organization as a Software Engineer Intern.

I am proud of the work I have done in leading or collaborating on the development of a variety of applications in both professional and academic settings, for Target, TeamDynamix, and within Georgia Tech. My work has included full-stack architecture and engineering on a variety of advanced business and science applications incorporating artificial intelligence, machine learning, and other technologies. I have directly programmed core functionality, coded, and tailored AI behaviors, constructed data management frameworks, and enabled interoperability with a variety of ecosystems. You will find that I have a strong programming aptitude, learn new technologies quickly, am highly entrepreneurial, and am highly effective in leading in team environments.

Thank you so much for your time and consideration. I look forward to connecting with you soon to discuss my qualifications and OpenAI's objectives of creating an ethical AGI in further detail and would be happy to share samples of my work upon request.

Sincerely,
Gregory Elias
